Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Claims 1-56, 59 and 60 drawn to a light-emitting device with extraction efficiency of the light-emitting device substantially independent of the length of the edge or the surface of the first layer has a dielectric function that varies spatially as a pattern and at least about 45% of a total amount of light generated by the light-generating region emerges from the light-emitting device via a surface of the first layer.

Species II: Claim 57 and 61 drawn to a light emitting device with quantum efficiency of the light-emitting device substantially independent of the length of the edge.

Species III: Claims 58 and 62 drawn to a light emitting device with a wall plug efficiency of the light-emitting device substantially independent of the length of the edge.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is held generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 2879

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Sean P. Daley on 12/22/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn Zimmerman whose telephone number is (571) 272-2466. The examiner can normally be reached on M-W 8-5.
